Online Skincare Shop - Main features

The project represents an online skincare shop with products available for purchase. The application offers two levels of access: users are able to view the available skincare products and purchase them; administrators are able to view and modify the records stored in the database by adding, deleting or updating products or suppliers.

A basic version of the data model:

The main features of the app:

1. As a user i want to be able to view all products available in the shop
2. As a user i want to be able to view each individual product and add it to the cart
3. As a user i want to be able to place an order(creation of order record and its associated delivery and invoice records)
4. As an adminstrator i want to be able to update a certain product
5. As an administrator i want to be able to add new products and suppliers
6. As an administrator i want to be able to delete products and suppliers
